EDUCATION

•JECRC University, Jaipur	Aug 2022 – May 2026
B.Tech in Computer Science and Engineering	CGPA: 8.0
•Ram Krishna Se. Sec. School, Sikar	2020 – 2021
Senior Secondary (Class XII), Rajasthan Board	Percentage: 88%

TECHNICAL SKILLS

Languages: C++, HTML, CSS (SCSS), JavaScript, Python
Frameworks: ReactJS, Tailwind CSS, Bootstrap, Django, Django REST Framework
Databases: SQLite, MySQL, PostgreSQL
Developer Tools: VS Code, Git, GitHub, Postman
Core CS: Object-Oriented Programming, REST APIs, Data Structures & Algorithms

EXPERIENCE

•Infomatrix Digital Solution	Jan 2026 – Present
Full Stack Developer Intern	Hyderabad, India
- Developed and maintained scalable full-stack web applications using ReactJS, Django, and Django REST Framework, improving development efficiency by 25%. - Constructed 15+ responsive and reusable frontend components with ReactJS, JavaScript, Bootstrap, and Tailwind CSS, ensuring cross-browser compatibility across 4 major browsers. - Architected 20+ robust RESTful API endpoints, establishing secure workflows via JSON Web Tokens and granular authorization to protect sensitive application data.	

PROJECTS

•Job Portal Web Application [Live]	Jan 2025 – Feb 2025
ReactJS, Django, Django REST Framework, SQLite	
- Devised a scalable full-stack Job Portal Platform supporting up to 500+ concurrent users, enabling recruiters to manage 50+ active job listings seamlessly. - Implemented login and access management systems for 3 distinct user roles (Admin, Recruiter, Applicant), ensuring 100% isolated data environments. - Programmed 10+ backend services using Django REST Framework and linked them with an interactive ReactJS client, reducing server request overhead by 20%. - Accelerated API performance and database operations, decreasing application latency by 200ms and enhancing overall UI responsiveness.	
•Hotel Management System [Live]	Dec 2025 – Jan 2026
ReactJS, Tailwind CSS, Django REST Framework, JWT Authentication	
- Created a comprehensive Hotel Management System structured to process 100+ simultaneous room bookings and streamline administrative operations. - Designed 25+ responsive UI components using ReactJS and Tailwind CSS, improving user retention and maintainability. - Configured 12 protected API endpoints, seamlessly managing session states and administrative privileges to ensure system integrity. - Embedded real-time booking workflows and admin dashboards, reducing manual booking verification time by 40%.	
•Eventify - Event Management Platform [Live]	Apr 2026 – May 2026
ReactJS, Django REST Framework, PostgreSQL, JWT Authentication	
- Spearheaded the creation of a full-stack Event Management Platform capable of hosting 200+ active event listings and managing attendee registrations. - Orchestrated backend communication and data delivery, strictly controlling access for 1000+ simulated API requests through tokenized security measures. - Utilized PostgreSQL for efficient relational database management, structuring queries to handle datasets exceeding 10,000+ rows with zero data loss. - Deployed production-ready applications using Render and Netlify, achieving a 99.9% uptime standard for user accessibility.	

ACHIEVEMENTS

- Solved **400+ DSA Problems** across platforms including LeetCode, GeeksforGeeks, and Codeforces.
- 5-Star in C++ on HackerRank** (2022) – demonstrating strong programming fundamentals.
- Winner of CodeHunt** in Rhythm (2025) – competitive programming contest.
